

RUM calls for

# Architect Interns (students), Horsens

Do you want to be part of a dedicated architectural firm with strong visions and lots of exciting projects that you can take part in? And do you want to be part of an interdisciplinary team of 60 committed colleagues who, like you, are passionate about creating good architecture, and who prioritize teamwork, development and a good social environment?

As an intern at RUM, you will work closely together with your colleagues in Horsens and Copenhagen. You will be actively involved in teamwork and individual project processes.

Sketching tasks, idea development, participation in competitions, design, user processes and space administration are some of the tasks you can work with.

We expect you to be familiar with the Adobe suite, Auto Cad and Sketch-up or Rhino. Knowledge of Revit is also an advantage.

We offer lunch arrangements as well as grants for SU and transport. The train from Aarhus runs every 15 minutes, and it only takes 30 minutes to Horsens Station. Our office is 5 minutes walk from the station in a beautiful building from 1875.

If you are interested in an internship at RUM in Horsens for the spring of 2022, please send your application and portfolio to [ansoger@rum.as](mailto:ansoger@rum.as). Label the application 'Architect Intern Horsens'.

We look forward to hearing from you.
