

RUM calls for

Constructing Architect Interns (students), Copenhagen V

Do you want to be part of a dedicated architectural firm with strong visions and lots of ambitious projects that you can take part in? And do you want to be part of an interdisciplinary team of 60 committed colleagues who, like you, are passionate about creating good architecture, and who prioritize teamwork, development and a good social environment?

As an intern at RUM, you will work closely together with your colleagues in Copenhagen and Horsens. You will be actively involved in teamwork and individual project processes. With us, you can try your hand at a wide variety of tasks within virtually all types of buildings

You will work on combining architectural ideas with buildable and sound, technical solutions during design and supervision on the construction site.

You must be a skilled 3D Revit user and have a flair for BIM.

We offer lunch arrangements as well as documented costs for transport. Our office is located on Vesterbrogade in the center of Copenhagen.

If you are interested in an internship at RUM in Copenhagen for the spring of 2025, send your application to ansoger@rum.as. Label the application 'Constructing Achitect Intern Copenhagen'.

We look forward to hearing from you.

We are RUM

RUM crafts and transforms the physical environments of tomorrow within Healthcare, Residential, Education and Culture, and Commercial.

With strong team spirit and a celebration for diverse perspectives, we collectively raise the bar for sustainable, functional, and aesthetically pleasing architecture that instills social value while making the lightest possible impact on nature and climate.

RUM represents a consultancy that meets its clients at eye level. We center our approach on co-creation, firmly believing that we can achieve better results together. That is why, at RUM, architecture and process with clients and users go seamlessly hand in hand. From the very first concept to the moment the project is operational, and culture thrives within its new setting, we remain in dialogue with our clients to achieve the best solution for them and with them.
